

TABLE 1: Data on food waste amounts Unit: tonnes of fresh mass																
Country:		SI														
Reference year:		2020														
name_r2 Stage of the food supply chain		Total food waste according to Article 1 of 2019/1597*														
		Total food waste**					Of which: edible food waste***					Food drained as or with wastewaters				
		COL	Standard footnote	Confidentiality	Explanatory footnote		COL_ED	Standard footnote	Confidentiality	Explanatory footnote		DSP_WW	Standard footnote	Confidentiality	Explanatory footnote	
A01_A03_FOOD	Primary production	98,385			1	In primary production, only	6,101	E		1	In primary production, only					
C10_C11	Processing and manufacturing	10805,697					126,324	E								
G46_G47_FOOD	Retail and other distribution of food	15263,548					10420,350	E								
I55_I56_N-S_FOOD	Restaurants and food services	50034,736					23158,015	E								
HH	Households	78453,321					25928,984	E								
TOT	Total	154655,687					59639,774	E								

Notes:

Cell shading:

White: Data provision is mandatory.
Light grey: these cells usually contain formulas, but can be overwritten by the users as they are not locked; in case of prefilling, the formulas are substituted with the reported value.
Light blue (cyan): Data provision is voluntary.
Light orange: Footnotes (only to be filled-in when relevant)

* Food waste as referred to in Article 1 of Commission Delegated Decision (EU) 2019/1597. Food waste reported here shall exclude amounts of food losses and food drained as or with wastewaters. As the unit is in tonnes of fresh mass, the food waste amounts shall include also an estimate of the water content when it was in the status of food fresh mass. Data on food drained as or with wastewaters are reported separately, also in tonnes of fresh mass.

** Total food waste including edible and inedible parts of the food but excluding food drained as or with wastewaters

*** Amounts of food waste excluding the inedible parts of the food

Note: The Commission encourages countries to provide voluntary data on the disaggregated amounts of edible food waste and food drained as or with wastewaters; Eurostat acknowledges that the quality of voluntary data is not as high as expected for mandatory data.
